

Out of Hours notice - Northbourne Avenue
Alinga Street intersection
to Elouera-Gould Streets intersection
7 – 31 JANUARY 2019

Canberra's first stage of Light Rail is progressing and construction is nearing completion. This is an exciting time in our City and Canberra Metro is working hard for Light Rail services to commence.

Construction Works:

Landscaping activities are required during out-of-hours from the Alinga Street intersection and Elouera-Gould Streets intersection. Associated works will include paving and platform edging installation and vacuum excavation near live services. Hours of work will be from **8:00pm to 6:00am** and will only take place as and when required during the period 7 – 31 January.

Traffic Management and Detours:

There will be **no change** for traffic travelling northbound and southbound along Northbourne Avenue during these works.

Traffic management will be in place and highly visible throughout the works, including signage and personnel.

Additional Information:

The equipment to be used will include haulage trucks, a bobcat, excavator and a front-end loader.

The project team will ensure the number of machines operating at the same time is limited and equipment turned off when not in use. Non-tonal reversing beepers will be used* and workers will be instructed to keep noise to a minimum.

These works are designed to transform Canberra, making it more accessible and to provide greater commuter connectivity across an integrated public transport network. We appreciate the continued patience of the public and the support of the Canberra community as we carry out these works.

More information can be found by visiting www.canberra-metro.com.au. If you have any questions in relation to works in your local area, please contact Canberra Metro:

Are you Rail Ready?

OVERHEAD WIRE INSTALLATION – The overhead wire is LIVE and carries 750 volts of power. It will cause fatal injuries if touched. Keep away! Download a fact sheet including safety tips.

* Except for elevated work platforms which are required by safety regulations to have tonal beepers.
