

OUT-OF-HOURS NOTICE
BARTON HIGHWAY AND FEDERAL HIGHWAY INTERSECTION
15-16 JANUARY 2018

Canberra's first stage of Light Rail is coming to your area, and construction is well underway. This is an exciting time in our City and Canberra Metro is working hard to see this vision come to life.

Most light rail construction work is being carried out during day hours as it is more efficient, as well as safer for the workers and the public. However, in some circumstances, there will be some work that is required out-of-hours because it involves roads and intersections that must be accessible to peak and day traffic, particularly for emergency service vehicles.

Scope of Works:

The installation of traffic signals has been scheduled for the Barton Highway and Federal Highway intersection at Northbourne Avenue. This work is proposed for **one night only starting at 8:00pm on Monday 15 January to 6:00am Tuesday 16 January**. The works may be extended to the following night should inclement weather occur.

Additional Information:

No traffic detours are required whilst these out-of-hours works are taking place. However, traffic management will be present.

The equipment and plant to be used includes excavator, hydrovac truck, light vehicles and trucks. Due to the nature of the work, some of the activities will be noisy.

The construction team will limit these impacts wherever possible by reducing the number of machines operating at the same time and turning off equipment when not in use. Noise blankets will be installed where practical. Non-tonal reversing beepers will be used and workers will be instructed to keep noise to a minimum.

Thank you for your patience during these important works.

More information:

If you have any questions related to works in your local area or the wider project, please contact Canberra Metro:

Safety Tip

A major milestone on the Canberra Metro Light Rail Project that will soon take place is the installation of power poles for the energisation of the system. This is an important reminder to stay safe and be aware of forthcoming changes such as overhead wire installation, power substations and Light Rail Vehicle testing.
